---

Hi David,

FYI, I will be out of the office for two weeks for training (until the end of October) and Chris will be Acting Director in my absence. I'll be checking email periodically, but please keep Chris in the loop on anything requiring PDP's attention.

We need to announce one replacement commodity for nectarines (to begin January 2016) on *November 15<sup>th</sup>*. So, ignoring the white elephant in the room, here are some potential replacements – the commodity will go to the California lab:

Milk – last tested in 2011

Sweet potatoes – last tested in 2010

Mangoes – last tested in 2010

Hot peppers – last tested in 2011

Cabbage – last tested in 2011

Onions – last tested in 2012

Canned pineapple? Fresh done over 10 years ago.

We need to add eggs but will need additional funding to do so in NSL. Same for grains – we need corn and wheat data but would need additional funds to partner with GIPSA.

Thanks,  
Diana
